## THE PERSONAL SAFETY INSURANCE

Most of us take our safety for granted. We live as if accidents never happen and being active and able are guaranteed. But the truth is, we don't tend to focus on safety until it's been compromised.

Accidents happen all the time – on the job, at home, on the road, or at times of leisure. They are not necessarily a result of risky behavior; although that certainly does increase your chances of being hurt. Some accidents are easy to recover from – but others are not.

You may think that this would never happen to you. But what makes you so sure?

Have you ever given serious thought to what you would do if you suffered a serious accident?

An accidental injury could seriously affect your quality of life. Aside from the pain and inconvenience of suffering any damage to your health, it could also limit your ability to work and provide financial support for your family.

With such risks involved, it may be time to consider personal safety insurance.

By taking this simple step, you can rest assured that you will have the financial support you need if you suffer an unexpected accident. Safety insurance eliminates your fears about hospital fees, loss of income, and your family's well-being.

You can't predict what tomorrow may bring, but by taking the right step with [Allianz Safety Plus](#), you can at least be prepared.
